

Chetan P S

Tech Lead | Full Stack Engineer - Senior Backend

chetanps11@gmail.com | +91 97035 23197 | Bangalore, India | [LinkedIn](#)

Tech Lead and Full Stack Engineer with 10+ years of experience designing, building and scaling distributed systems and high-traffic platforms. Strong expertise in Java, Spring Boot, Node.js, Kafka, asynchronous and concurrent programming and cloud-native microservices. Proven track record of handling millions of requests and events per day, improving system performance, reliability and observability. Experienced Tech Lead with a hands-on approach to system design and mentoring engineers.

Technical Skills

Languages & Frameworks: Java (17+), Spring Boot, Node.js, JavaScript, TypeScript, Angular, React.js

Tools & Platforms: PostgreSQL, Kafka, MongoDB, GRPC, REST, GraphQL, Docker, AWS, Strapi, APIGEE, Splunk, GIT, Maven, Gradle, Microservices, SQL, Victoria Metrics, Agile methodology

Professional Experience

Lead Engineer Full Stack | Tejas Networks | Apr 2025 – Present | Bangalore, India

- Designed and built a scalable monitoring platform processing millions of metrics and signals per day using asynchronous collectors, Kafka and time-series storage
- Designed an asynchronous, non-blocking HTTP collection pipeline in Java, reducing processing time for **100K+ HTTP requests per cycle to under 5 minutes**
- Built scalable data ingestion and storage pipelines using Kafka and time-series databases
- Optimized concurrency, thread pools and backpressure handling to prevent collector backlogs and improve system stability

Tech Lead - 3 | Carelon Global Solutions | May 2018 – March 2025 | Bangalore, India

OKTA migration: Re-designed complete authentication mechanism to use OKTA OIDC with PKCE flow improving platform security and compliance

Elevance Health Insurance Platform (<https://www.anthem.com/>) :

- Directed a cross-functional team of 5 engineers across frontend & backend development and 3 QA Engineers while maintaining hands-on ownership of critical services
- Led development of member engagement features that include Action plans, Health news, Activity tracking through physical devices, Incentives and streaming rewards program through GRPC. These features **increased the customer logins by 32%**
- Innovated and implemented an internal observability tool that **reduced production issue resolution time by 3-5 days** for support and engineering teams
- Automated local developer setup, **reducing onboarding time by one full day**
- Recognized as Tech Lead of the Month Feb 2023

E-Communication Platform: Led architecture and development of scalable backend systems **serving 100K+ daily events**. It is responsible for all digital communication (push notifications to mobile applications, SMS, Email, Secure messages, In-app notifications) sent out to all Elevance Health members.

Senior Software Engineer | Capgemini | Dec 2015 – May 2018 | Hyderabad, India

Full stack developer - Developing Payments module of the Banking application along with Backtracking feature

Education

Bachelor of Engineering (ECE) - GSKSJIT Institute of Engineering, VTU | 2011 – 2015
